Professional Summary

AI/ML graduate with hands-on experience in Python, machine learning, computer vision, image processing, OCR, and backend API development. Experienced in developing AI solutions for face matching, image enhancement, document processing, and data analysis during an AI/ML internship and academic projects. Skilled in Python, SQL, Scikit-learn, OpenCV, FastAPI, Pandas, NumPy, and data visualisation tools.

Experience

AI/ML Intern | Alpha Finsoft Pvt. Ltd. | Nov 2025 – Mar 2026

• Developed and tested computer vision solutions for image enhancement and face-matching applications using Python-based AI/ML tools.

• Performed image preprocessing, feature extraction, model evaluation, and optimization to improve AI model performance.

• Worked with computer vision models and datasets for training, validation, and performance testing.

• Contributed to integrating AI models into application workflows and documented model performance and optimization results.

Projects

AI Document Processing Pipeline

Technologies: Python, FastAPI, OpenCV, OCR

- Developed an AI-based document processing pipeline combining image preprocessing, OCR, image enhancement, and document classification.
- Built FastAPI endpoints to process documents through the pipeline and return structured processing results.

Animal Species Classification

Technologies: Python, Scikit-learn

- Developed a machine learning classification model to identify animal species from dataset features.
- Performed data preprocessing, model training, and evaluation to assess classification performance.

Blinkit Sales Dashboard

Technologies: Tableau, SQL

- Created an interactive Tableau dashboard to analyse Blinkit sales data and identify key business trends.
- Used SQL and data visualisation techniques to explore sales performance and present actionable insights.

Face Matching & Liveness Detection for KYC

Technologies: Python, OpenCV, InsightFace

- Developed a computer vision system for face matching and liveness detection to support identity verification workflows.
- Used OpenCV and InsightFace for face processing, feature extraction, and identity matching.

Technical Skills

Languages: Python, SQL

Machine Learning: Scikit-learn, Random Forest, Supervised Learning, Unsupervised Learning, Model Evaluation

Computer Vision: OpenCV, InsightFace, Image Processing, Face Matching, Image Enhancement

Deep Learning: TensorFlow, Keras

Data Analysis & Visualisation: Pandas, NumPy, EDA, Data Cleaning, Tableau, Power BI, Matplotlib.

Backend Development: FastAPI

Tools: Git, GitHub, Jupyter Notebook, Streamlit

Education

Bachelor of Science (B.Sc.) in Artificial Intelligence & Machine Learning
Tata Institute of Social Sciences (TISS), India | 2023 – 2026

Relevant Coursework: Machine Learning, Deep Learning, DBMS, Statistics, Python Programming

Higher Secondary Certificate (HSC) – Science
Chembur Karnataka Junior College, Mumbai
2021 – 2023

Certifications

• Data Analysis with Python — Cognitive Class | Jul 2025
• Deloitte Australia Data Analytics Job Simulation — Forage | Jul 2025
• Accenture North America Data Analytics & Visualisation Job Simulation — Forage | May 2025
